

Consolidation Q & A

- 1) Why are you deciding now to consolidate to one building
 - a) This is not a new decision. Over the last 10 years, the different members of the LBI Board of Education have agreed on one thing, that consolidating the students into one building would be beneficial for not only the students and staff but also for the taxpayers, however, they differed in which building.
 - i) In 2010 a feasibility study on consolidation was ordered by the Mayors of Surf City, Ship Bottom, Harvey Cedars, Barnegat Light and Long Beach Township, and the study concluded that it was feasible to combine the 2 schools into a single site, and it was determined that the best option was to sell the LBI School.
 - ii) In 2017 the 2-question, \$18.4M referendum to renovate the EJ Building and add an addition was voted down by the taxpayers as being too costly.
 - iii) In 2019, the \$7.6M referendum to make necessary structural repairs and minor renovations to the LBI Building failed due to the uncertainty of the structural repairs under the building, the concern that the building was not large enough to accommodate all the students, and the past damage from Superstorm Sandy.
- 2) What recent steps did you take to determine which building to keep
 - a) The Board of Education engaged Spiezzle Architectural Group to evaluate each building and provide a report including:
 - i) The cost to renovate the LBI Building
 - ii) The cost to renovate the LBI Building and add an addition to consolidate all the students
 - iii) The cost to renovate the EJ Building
 - iv) The cost to renovate the EJ Building and add an addition to consolidate all the students
 - v) The cost to demolish and construct a new building
 - b) The Board of Education also engaged a Real Estate Appraisal company to appraise both properties
 - c) Based on the aforementioned reports it was determined that consolidating to the EJ Building was the solution.
- 3) Why am I only hearing about this now?
 - a) See #1
 - b) The decision to choose the EJ School came after the BOE engaged with an architectural firm to provide cost estimates for consolidation at each building.

The architectural firm presented their findings to the public in July 2020. The uncertainty of necessary structural repairs under the LBI Grade School was a key determining factor to choose the EJ School. The representative from the engineering firm, (who has been monitoring the structural condition of the LBI Grade School for several years and conducted numerous inspections) was present at the public meeting and indicated he would not invest any more funds into the renovation of the LBI Grade School Building.

- 4) How much will this cost
 - a) The estimated cost of the addition is \$16 million. However if we do not have all the funds available certain pieces of the plan will be put on hold until funds are available
- 5) How much is this going to cost the taxpayers
 - a) The BOE plans on using the funds from the property sale to pay for the construction. There will be no cost to the taxpayers.
- 6) What exactly is being added in the addition and how big will it be
 - a) The 15,700 addition will include 6 classrooms, science room and gymnasium
- 7) Will there be 2 gymnasiums
 - a) The existing gymnasium is not full size and after discussions it was determined that the space would be better utilized as a cafeteria & interior office spaces
- 8) Are any Staff being let go
 - a) Any staff reductions will be through attrition
- 9) Will the class sizes increase
 - a) The addition will allow for 2 classrooms per grade, the same as we currently have
- 10) What happens during construction, will the kids be “squeezed” into EJ
 - a) For the first year of construction a couple of grade levels will be temporarily relocated to another location. Once construction is completed there will be 2 classrooms for each grade level, the same as the district currently has
- 11) Why the EJ school and not the LBI Grade School
 - a) The uncertainty of necessary structural repairs under the LBI Grade School was a key determining factor to choose the EJ School. The representative from the engineering firm, (who has been monitoring the structural condition of the LBI Grade School for several years and conducted numerous inspections) was present

at the public meeting and indicated he would not invest any more funds into the renovation of the LBI Grade School Building.

- b) Anticipated value of the LBI Grade School Property
- 12) Why can't we go out to referendum and keep both schools (see #1 above)
- a) The taxpayers have twice voted down a referendum. The first time to consolidate to the EJ School and the 2nd time to keep both schools and make necessary repairs to the LBI School
- 13) Is the district suing Ship Bottom
- a) The Board of Education reached out to the Borough of Ship Bottom twice to inquire whether the Borough was interested in acquiring the LBI Grade School Property. No response was ever received from the Borough causing the BOE to then advertise the sale of the property via public bid. With knowledge of the BOE's efforts to sell the LBI Grade School Property, the Borough of Ship Bottom and the Ship Bottom Land Use Board moved forward requesting and approving a Reexamination to the Borough's Master Plan and an amendment to the Borough's Zoning Ordinance specifically as it relates to zone governing the LBI Grade School property. These actions have made it almost impossible for the LBI Grade School property to be sold and developed. In April the BOE engaged an attorney specializing in Land Use to represent the school district. A suit was commenced against the Borough and the Land Use Board challenging their actions. That suit is proceeding in due course.
- 14) How much are you selling the property for
- a) The advertised minimum bid for the property is \$12,000,000
- 15) How big is the property
- a) The Ship Bottom property is just shy of 5 acres
- 16) Is it true the school district doesn't own the EJ School Property
- a) The Board of Education owns the EJ School and property located in both Surf City and Ship Bottom. However, the borough of Surf City has a right of first refusal to purchase that portion if we were ever to sell it
- 17) Are there currently any buyers for the property
- a) At the August Board Meeting, the BOE once again approved the Board Attorney to negotiate the sale of the LBI Grade School Property on its behalf. Those negotiations are commencing and being reviewed in light of the ongoing litigation and the Borough's and Land Use Board's actions.
